Caterina

Patient Chair

The Caterina Patient Chairs are designed to offer superior comfort and support in healthcare settings. Innovative features, such as the flex tall back and the optional short flex back, provide flexibility and adaptability to the user's needs. The chair's design includes a visible and open cleanout, facilitating easy maintenance, and back legs that protect walls from damage. Moreover, the field-replaceable seat and back cushions ensure longevity and sustained comfort, making it an ideal choice for patient rooms.

Model: CTEP12

Features

Flex Back

Frame enables a modest amount of flexibility in the back only; seat, arms and legs remain stationary.

Optional Flex Short Back

The frame, which enables a small amount of flexibility in the back only, is also available in the short back version and is optional.

Wallsaver

Wallsaver back legs help keep walls in pristine condition.

Durable Finish

Kwalu's solid surface (1/8" thick) proprietary finish doesn't have any of the drawbacks of wood. The frames are moisture impervious, graffiti-resistant, easy to clean and maintenance-free.

Steel Reinforced

Our patented steel-reinforced joint system uses over 20 pieces of steel in most Kwalu chairs. Stop ongoing and costly furniture replacement.

Visible Cleanout

Cleanout prevents build-up of debris and provides for easy maintenance.

Back Cushion and Seat Cushion are Field Replaceable

Both the back cushion and the seat cushion can be replaced in the field.

10 Year Warranty

We offer a 10 Year Performance Warranty on both construction and finish, so the product is guaranteed to stay looking like new for 10 years.
